Aldingbourne Parish Council.

Dear Joanne

Barnham Trojans FC request permission to extend the goals compound currently in use on the sports field.

With the number of goals needing to be stored we are having difficulty keeping the compound area tidy and in hindsight should have made it larger in the first place.

The club have placed an order for a set of free standing goals for the coming season and have another slightly smaller freestanding set coming in from one of our other venues. The current compound is not big enough for these additional goals which do not “collapse” down.

We would like to add the extension to the rear of the existing compound to extend onto the concrete base (the old cricket net base). Planning permission was not required for the original compound so should not be required for the proposed extension. The extension will not affect the dog walker’s route round the back of the compound

Barnham Trojans will meet all costs involved and will ensure the extension is in keeping with the existing one, albeit a lot tidier.

I have copied in the ACSC Trustees as their permission is also required and will bring this item up at the first available ACSC Management meeting which will be prior to the next APC meeting.

Dennis Leonard
